Unsure how to take the next step?

You do not need to figure it out alone. It is a good idea to think about someone you feel comfortable with who could assist you in finding what step you would like to take next.

If you don't know who you could talk to you can call one of the services on the next page or refer to the flow chart on the front page.

Grounding Exercise

Do you sometimes feel like you are spinning and everything is overwhelming? This can be anxiety and a helpful way to help bring yourself back into the present moment is to try a grounding exercise such as this:

- What are FIVE things you can see?
- What are FOUR things you can touch?
- What are THREE things you can hear?
- What are TWO things you can smell?
- What is ONE thing you can taste?

This becomes more effective the more you practice it and sometimes you might need to do it a few times.

Making a Doctor's Appointment

If you are a young person over 12 you can make a doctor's appointment for yourself. You can call or you can download the Ochre app. 

You do not need permission from your parent or carer.

You can decide who the medical centre has as your next of kin to call in an emergency.

If you do not have your own Medicare card or a photo of it, the medical centre can look this up for you.

What you discuss with the doctor will remain confidential. The doctor will only tell someone if there is a risk to your safety or the safety of someone else.

The doctor will bulk bill anyone under the age of 18. This means you do not need to pay anything.

A doctor can give you a Mental Health Care Plan and link you to other support services.

The doctor is there to help you and support you. You can take someone to the appointment with you if you would like to.
